

Window Automation

LIFTECH

The Leo Powered Window Operator offers a complete natural ventilation solution for windows that are too high or become difficult to reach. They can be installed in locations such as bedrooms, bathrooms, kitchens or living areas.

With their slim functional design and wide range of activation options, we have a window operator that not only looks good but does all the hard work for you. They can be opened and closed, even stopped midway, at the touch of a button, tap on a smart phone or voice command.

Natural ventilation is so important in terms of air quality that it forms part of Building Regulations Part F.

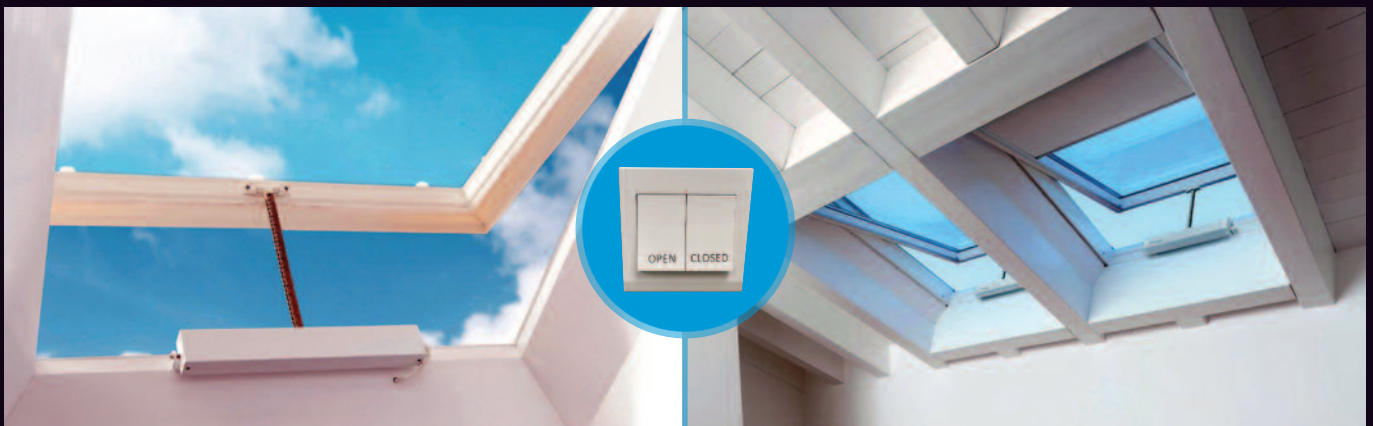

Features Include:

- Surface Mounted (manual hold to run) Control Switch
- Remote Control Handset
- Bespoke and custom design activation*
- Easily installed to side, top or bottom hung windows, even sash windows. Large windows can be controlled with two or three synchronised actuators*
- App controlled via a Smart phone or tablet **
- Voice Activation via Amazon Alexa or Google Assistant **
- Integration with existing Environmental Control Systems
- Anti entrapment safety features

* (Installation is subject to a free of charge site survey by Liftech Systems)

** (Voice Activation and App control is subject to property WiFi strength and Amazon/Google Account)

Technical Specification

- **Window Motor/Actuator**
Dimensions: 332mm (w) x 30mm (h) x 42mm (d)
- **Motor/Actuator Voltage: 24v DC 500mA**
(Via 240v AC Remote Controller Transformer)
- **Power Consumption:**
Full Load 77 Watts (Idle <0.5 Watt)
- **Motor Controller/Transformer (Located remotely)**
Dimensions: 220mm (w) x 220mm (h) x 40mm (d)
- **Protection Class: IP 20**
- **Operating Conditions: -5°C - +45°C**
- **Colour: White**
